Email us with accessibility issues with this report.

In the West, dry buttermilk prices moved higher at both ends of the range and mostly price series. Domestic demand is somewhat stronger. Demand from international buyers is steady. Cream production continues to keep butter churning stable, which is making a steady flow of liquid buttermilk available for drying. Dry buttermilk production schedules are generally steady. Manufacturers continue to report tight spot load inventories.

### Prices for: Western U.S., All First Sales, F.O.B., Conventional, and Edible Buttermilk

|                         |                 |
|-------------------------|-----------------|
| Price Range ; \$/LB:    | 1.6000 - 1.8500 |
| Mostly Range - ; \$/LB: | 1.7000 - 1.8000 |
