Buttermilk powder markets are steady, though some adjustments were made to reflect current trading conditions. The price range is lowered on reported market activity. This action tracks the recent price decline of nonfat dry milk prices that compete for available dryer time. Eastern buyers continue to report difficulty securing spot buttermilk powder as inventories remain tight. Butter production remains steady, supporting liquid buttermilk availability for drying. However, dryer schedules continue to favor nonfat dry milk, which is limiting buttermilk powder output.

Prices for: Eastern and Central U.S., All First Sales, F.O.B., Conventional, and Edible Buttermilk

Price Range ; \$/LB:	1.5400 - 1.7200
