The dry whey price band moved higher, supported by reported trading activity and aligning with CME reported trades. Contacts reported increased whey buying ahead of the expected tender from Japan next week. Manufacturers continue prioritizing WPC 80% and WPI production due to active demand from sports-nutrition and protein-enhanced food formulations. Contacts are noting some resistance to WPC 80 and WPI pricing following recent rapid run-ups. Production of Extra Grade and Grade A dry whey remains secondary, keeping spot availability tight. Market tone is steady to firm.

Prices for: Eastern U.S., All First Sales, F.O.B., Extra Grade & Grade A, , Conventional, and Edible Dry Whey	
Price Range - Non-Hygroscopic; $/LB:	.6400 - .7300

Information for the period July 13 - 17, 2026, issued weekly
