Email us with accessibility issues with this report.

Cheese production in the East remains steady, supported by adequate milk supplies. While seasonal hot weather impacts milk volumes and component levels, contacts describe current solids as acceptable and not concerning. Demand has softened in line with typical July trends, with branded items continuing to be influenced by necessary retail price adjustments. Contacts note contracting for private-label and value-priced cheese is holding at expected levels. Inventories remain stable and positioned where manufacturers desire them. The overall market tone is considered steady to slightly weaker.

Information for the period July 13 - 17, 2026, issued weekly
