	)	
Mapeks USA, LLC	)	
	)	**Administrator's Decision**
	)	**APL-014-25 and APL-049-25**
Allentown, Pennsylvania	)	

This Decision responds to an Appeal (APL-014-25) of a combined Notice of Noncompliance and Notice of Proposed Revocation and an Appeal (APL-049-25) of a Notice of Proposed Suspension of Certification under the National Organic Program (NOP) issued to Mapeks USA dba Mac Global (Mapeks USA) of Allentown, PA, by USDA accredited certifier Pennsylvania Certified Organic (PCO). The operation has been deemed not in compliance with the Organic Foods Production Act of 1990 (Act)[1] and the U.S. Department of Agriculture (USDA) organic regulations.[2]

BACKGROUND

The Act authorizes the Secretary to accredit agents to certify crop, livestock, wild crop, and/or handling operations to the USDA organic regulations (7 CFR part 205). Certifying agents also initiate compliance actions to enforce program requirements, as described in section

[1] 7 U.S.C. 6501-6522
[2] 7 C.F.R. Part 205

205.662, Noncompliance procedure for certified operations. The NOP may also initiate compliance actions against operations and certifying agents to enforce program requirements. Persons subject to the Act who believe they are adversely affected by a noncompliance decision of a certifying agent, or the NOP may appeal such decision to the USDA Agricultural Marketing Service (AMS) pursuant to § 205.680 Adverse Action Appeals Process – General, and § 205.681, Appeals of the USDA organic regulations.

FINDINGS OF FACT

1. On October 5, 2023, PCO certified Mapeks USA for handling Individual Quick Freezing (IQF) fruits and vegetables.
2. On March 15, 2024, the NOP received a complaint from a former employee of Mapeks USA alleging it knowingly relabeled and sold nonorganic frozen diced peaches as organic. In response, on May 1, 2024, the NOP issued an Investigation Request to PCO.
3. On August 20, 2024, PCO issued Mapeks USA a Notice of Noncompliance and Notice of Proposed Revocation for intentionally representing, labeling, and selling nonorganic products as organic, falsifying documents, and having a lack of records to complete supply chain traceability and mass balance audits.
4. On September 19, 2024, Mapeks USA requested mediation with PCO. On October 7, 2024, PCO rejected Mapeks USA's mediation request, citing the willful and uncorrectable nature of the violation(s).
5. On September 20, 2024, PCO issued Mapeks USA a Notice of Noncompliance, due to Mapeks USA's Organic System Plan not complying with the organic regulations.

6. On November 5, 2024, Mapeks USA filed an appeal with NOP to PCO's August 20, 2024, Notice of Noncompliance and Notice of Proposed Revocation. For this appeal, NOP assigned Mapeks USA appeal number APL-014-25.
7. On February 3, 2025, PCO issued Mapeks USA a Notice of Proposed Suspension, for systemic failures of its Organic System Plan.
8. On March 3, 2025, Mapeks USA requested mediation to PCO's February 3, 2025, Notice of Proposed Suspension. On March 13, 2025, PCO rejected Mapeks USA's mediation request.
9. On March 14, 2025, Mapeks USA and NOP entered into a Settlement Agreement for APL-014-25. Among other things, Mapeks USA agreed to maintain complete records to determine organic status and to allow for tracing and matching all products through all stages of the supply chain, to submit a comprehensive fraud prevention plan to PCO, and to resolve all outstanding noncompliances identified by its certifier within the timeframe prescribed by the certifier.
10. On April 13, 2025, Mapeks USA appealed PCO's February 3, 2025, Notice of Proposed Suspension.
11. On April 15, 2025, NOP accepted Mapeks USA's appeal to PCO's February 3, 2025, Notice of Proposed Suspension and notified Mapeks USA of its breach of the March 14, 2025, settlement agreement with NOP. NOP requested that Mapeks USA submit annual renewal materials to PCO within 2 weeks, or by April 29, 2025, to resolve the breach. For this appeal, NOP assigned Mapeks USA appeal number APL-049-25.

12. On May 12, 2025, Mapeks USA responded to NOP's April 15, 2025, Informal Notice of Noncompliance, and provided documentation verifying the submission of its 2025 annual renewal materials to PCO.
13. On June 6, 2025, NOP issued Mapeks USA a Notice of Noncompliance and Request for Corrective Action for providing PCO an Exempt Handler List and traceability procedures that PCO deemed inadequate to satisfy the requirement for a comprehensive Fraud Prevention Plan. This was deemed a breach of the March 14, 2025, NOP Settlement Agreement for appeal case APL-014-25.
14. On June 12, 2025, PCO issued Mapeks USA a Certification Report and Notice of Noncompliance, for deficiencies in documentation for 10 items imported by Mapeks USA.
15. On July 2, 2025, Mapeks USA responded to NOP's June 6, 2025, Notice of Noncompliance and Request for Corrective Action, providing the updated Fraud Prevention Plan, updated traceability procedures, updated recall procedures, updated Exempt Handler List, and additional warehouse affidavits and warehouse certificates that had been requested by NOP.
16. On July 22, 2025, PCO issued a Notice of Noncompliance to Mapeks USA for failure to provide sufficient information demonstrating compliance.
17. On August 19, 2025, PCO notified NOP that Mapeks USA breached its March 14, 2025, Settlement Agreement. PCO determined that Mapeks USA provided insufficient records for PCO to successfully conduct a traceback of one shipment of sweet cherries; provided insufficient evidence to demonstrate that one shipment of nonorganic sweet cherries was sold as nonorganic; did not provide storage, inventory, transportation, and financial

records for the disposition of peaches as conventional; did not submit a comprehensive Fraud Prevention Plan; and failed to resolve outstanding noncompliances.

18. On August 21, 2025, Mapeks USA responded to PCO's July 22, 2025, Notice of Noncompliance. Mapeks USA cited corrective actions to its change management procedures, warehouse operations and exempt handler compliance, warehouse operations and exempt handler clearance, and fraud prevention and traceability.
19. On September 9, 2025, PCO determined that the corrective actions Mapeks USA provided on August 21, 2025, were insufficient. PCO gave Mapeks USA additional time until October 9, 2025, to submit its corrective actions. On October 7, 2025, Mapeks USA provided PCO with its Warehouse Notification and Procedures. On October 10, 2025, Mapeks USA provided PCO with sufficient Exempt Handler Affidavits.
20. On February 27, 2026, PCO notified NOP, via email, of additional breaches to the March 14, 2025, settlement agreement that addressed APL-014-25, and additional noncompliances.

REGULATORY CITATIONS

The USDA organic regulations at 7 CFR 205.400, General requirements for certification, state that, "A person seeking to receive or maintain organic certification under the regulations in this part must: (a) Comply with the Act and applicable organic production and handling regulations of this part …"

The USDA organic regulations at 7 CFR 205.100, What has to be certified, state that, "(a) except for the exempt operations described in 205.101, each operation or portion of an operation that produces or handles agricultural products intended to be sold, labeled, or represented as ‘100 percent organic,’ ‘organic,’ or ‘made with organic (specified ingredients or food group(s))’ must be certified according to the provisions of subpart e of this part and must meet all other applicable requirements of this part.”

The USDA organic regulations at 7 CFR 205.102, Use of the term, “organic”, states that, “Any agricultural product that is sold, labeled, or represented as ‘100 percent organic,’ ‘organic,’ or ‘made with organic (specified ingredients or food group(s))’ must be: (b) Handled in accordance with the requirements specified § 205.101 or § 205.270 through § 205.272 and all other applicable requirements of this part.”

The USDA organic regulations at 7 CFR 205.103, Recordkeeping by certified operations, state that, “(b) Such records must: […] (2) Fully disclose all activities and transactions of the certified operation, in sufficient detail as to be readily understood and audited; records must span the time of purchase or acquisition, through production, to sale or transport and be traceable back to the last certified operation; (3) include audit trail documentation for agricultural products handled or produced by the certified operation and identify agricultural products on these records…”

The USDA organic regulations at 7 CFR 205.201, Organic production and handling system plan, state that, “An organic production or handling system plan must include: [...] (3) … a description of the monitoring practices and procedures… to verify suppliers in the supply chain and organic status of agricultural products received, and to prevent organic fraud, as appropriate to the certified operation's activities, scope, and complexity:…and (6) Additional information deemed necessary by the certifying agent to evaluate compliance with the regulations.”

The USDA organic regulations at 7 CFR 205.300, Use of the term, “organic,” state that “(a) the term, ‘organic,’ may only be used on labels and in labeling of raw or processed agricultural products, including ingredients, that have been produced and handled in accordance with the regulations in this part. The term, ‘organic,’ may not be used in a product name to modify a nonorganic ingredient in the product.”

The USDA organic regulations at 7 CFR 205.400, General requirements for certification, state that, ”A person seeking to receive or maintain organic certification under the regulations in this part must: […] (d) [m]aintain all records applicable to the organic operation for not less than 5 years beyond their creation and allow authorized representatives of the Secretary, the applicable State organic program's governing State official, and the certifying agent access to such records during normal business hours for review and copying to determine compliance with the Act and the regulations in this part, as provided for in § 205.103; and (f) [i]mmediately notify the certifying agent concerning any: […] (2) [c]hange in a certified operation or any portion of a certified operation that may affect its compliance with the Act and the regulations in this part.”

DISCUSSION

Pennsylvania Certified Organic (PCO) certified Mapeks USA for handling of Individual Quick Freezing (IQF) fruits and vegetables on October 5, 2023.

On March 15, 2024, NOP received a complaint from a former employee of Mapeks USA alleging Mapeks USA knowingly relabeled and sold nonorganic frozen diced peaches imported from Turkey as organic. Specifically, the complaint alleged that Mapeks USA provided organic labels to its storage facility and instructed it to relabel items labeled as “IQF Peaches Diced” to “Organic IQF Peaches Diced” for multiple shipments of peaches during the 2 years prior to the complaint.

On May 1, 2024, NOP issued an Investigation Request to PCO requesting PCO perform an unannounced inspection of Mapeks USA and investigate the complaint allegations. PCO reported Mapeks USA was unable to provide adequate records to complete a successful traceability and mass balance audit on the diced peaches in question; the source of the peaches was unknown; and records associated with physical movement of the peaches, including import, shipping, and receiving documents, did not have organic designation. PCO found the term "organic" only appeared on Mapeks USA invoices and the unapproved labels Mapeks USA used to relabel peaches. NOP substantiated that Mapeks USA was in violation of the organic regulations for intentional misrepresentation of nonorganic peaches as organic.

On August 20, 2024, PCO issued Mapeks USA a Notice of Noncompliance and Notice of Proposed Revocation for selling nonorganic products as organic, and for the lack of documentation necessary to conduct required supply chain traceability and mass balance audits. Specifically, PCO conducted three separate unannounced inspections between May 28, 2024, and June 28, 2024, at a Mapeks USA facility; an entity in Mapeks USA's supply chain, [redacted]; and Mapeks USA's storage facility, [redacted]. PCO found multiple shipments of nonorganic diced peaches were labeled, sold, and represented as organic. In addition, nonorganic peaches located at multiple inspection sites were labeled as organic diced peaches, despite supply chain traceability audits determining the peaches were from nonorganic lots. Further, Mapeks USA did not provide enough documentation for PCO to conduct successful supply chain traceability and mass balance audits.

Lastly, PCO determined through sales invoices that an uncertified entity named Mapeks Organics was part of Mapeks USA's supply chain. Mapeks USA did not include Mapeks Organics in its Organic System Plan.

On September 19, 2024, Mapeks USA requested mediation with PCO. On October 7, 2024, PCO issued Mapeks USA a Notice of Rejection of Mediation. The Notice of Rejection of Mediation notes that Mapeks USA willfully violated organic regulations based on evidence collected across the global supply chain which demonstrated Mapeks USA knowingly purchased nonorganic products and represented, labeled, and sold it as organic.

On November 4, 2024, Mapeks USA filed an Appeal to PCO's Notice of Noncompliance and Notice of Proposed Revocation to NOP. In the appeal, Mapeks USA denied affiliation with its supply chain actor, (b) (4) [redacted], and its refrigeration storage, (b) (4) [redacted]. In addition, Mapeks USA denied purchasing, storing, or relabeling nonorganic product as organic.

On February 3, 2025, PCO issued Mapeks USA a Notice of Proposed Suspension for failure to provide additional supply chain evidence as requested in PCO's Notice of Noncompliance. According to PCO's Notice of Proposed Suspension:

- Mapeks USA's flow chart did not provide sufficient details to verify compliance of incoming product from Mexico.
- Mapeks USA's master product list included several products being exported to Canada without approval under the U.S.-Canada Organic Equivalence Arrangement.
- Mapeks USA's supply chain map did not address imports from Mexico and exports to Canada, as PCO had previously requested.
- Mapeks USA's supply chain map was missing the type of product transported, product package type, and role of each operation in the supply chain, among other details.

- Mapeks USA was missing documentation to determine its relationship with a retailer in its supply chain. In addition, Mapeks USA was missing the import certificate for the transaction of goods shipped to the retailer.

Therefore, PCO determined that Mapeks USA's Organic System Plan and recordkeeping was not compliant with the USDA organic regulations. PCO issued Mapeks USA a Notice of Proposed Suspension on February 3, 2025. At that time, Mapeks USA was in the process of entering into a Settlement Agreement with NOP to resolve the August 20, 2024, Notice of Noncompliance and Notice of Proposed Revocation.

On March 4, 2025, Mapeks USA requested mediation with PCO in response to PCO's February 3, 2025, Notice of Proposed Suspension. On March 14, 2025, PCO issued Mapeks USA a Rejection of Mediation, stating that Mapeks USA's noncompliances were not correctable. The rejection further stated that Mapeks USA's systemic failures in the design and implementation of its Organic System Plan and history of compliance violations demonstrated the inability for Mapeks USA to comply with organic regulations.

On March 14, 2025, NOP entered into a Settlement Agreement with Mapeks USA with respect to its appeal of August 20, 2024, Notice of Noncompliance and Notice of Proposed Revocation (APL-014-25). The terms set forth in the Settlement Agreement stated, among other things, that Mapeks USA would maintain complete records to determine organic status to allow for tracing and matching all products through all stages of the transactions; submit a comprehensive fraud prevention plan, detailing actions to be taken to ensure that no nonorganic product is imported, received, represented, labeled or sold as organic; and to resolve all outstanding noncompliances identified by the certifier within the timeframe prescribed by the certifier.

On April 9, 2025, Mapeks USA appealed PCO's February 3, 2025, Notice of Proposed Suspension.

On April 11, 2025, PCO informed NOP that Mapeks USA failed to submit its annual renewal material by PCO's March 1, 2025, deadline.

On April 15, 2025, NOP acknowledged Mapeks USA's appeal request to PCO's Notice of Proposed Suspension and subsequent Notice of Mediation Rejection and assigned NOP appeal number APL-049-25. As part of the acknowledgement letter, NOP issued an Informal Notice of Noncompliance for Breach of the NOP Settlement Agreement because Mapeks USA did not submit its annual renewal paperwork and fees to PCO.

On May 12, 2025, Mapeks USA responded to NOP's April 15, 2025, Informal Notice of Noncompliance, and provided an updated supply chain map and product flow diagram, updated Exempt Handler Declarations for all its storage locations, and updated Organic System Plan. In addition, Mapeks USA stated it would ensure no relabeling or handling would occur outside the certified scope and submitted annual renewal paperwork and fees.

On June 6, 2025, NOP issued Mapeks USA a Notice of Noncompliance and Request for Corrective Action for additional breaches of the NOP Settlement Agreement for appeal APL-014-25. NOP cited in its Notice of Noncompliance that Mapeks USA did not provide updates to the Fraud Prevention Plan section of its Organic System Plan. Further, the NOP stated Mapeks USA's Exempt Handler Affidavit did not account for all warehouses Mapeks USA used. In addition, the NOP cited that Mapeks USA's Exempt Handler List and traceability procedures were inadequate to meet the requirement for a comprehensive Fraud Prevention Plan described in the Settlement Agreement, particularly for the scale and scope of the activities Mapeks USA conducted. Lastly, the NOP cited that Mapeks USA's recall procedures in its Fraud Prevention

Plan did not provide details on how nonorganic fraudulent products would be diverted. As part of the Notice of Noncompliance and Request for Corrective Action, NOP requested Mapeks USA to submit a comprehensive Fraud Prevention Plan to PCO within 30 days, or July 6, 2025.

On June 12, 2025, PCO issued Mapeks USA a Certification Report and Notice of Noncompliance, due to missing import documentation for a sample of 10 items imported by Mapeks USA. Specifically, Mapeks USA stated in its Trade Supplement documentation that it maintained Commercial Invoices, Certificate of Analysis' (COA), Country of Origin (COO) documentation, Bill of Ladings, Transaction Certificates, and Warehouse receipts. However, PCO determined the majority of the 10 products imported were missing several of the documents.

On July 2, 2025, Mapeks USA responded to NOP's June 6, 2025, Notice of Noncompliance and Request for Corrective Action, providing the updated Fraud Prevention Plan, updated traceability procedures, updated recall procedures, an updated Exempt Handler List, and additional warehouse affidavits and warehouse certificates.

On July 22, 2025, PCO issued a Notice of Noncompliance to Mapeks USA, stating that additional details were required to determine the sufficiency of Mapeks USA's procedures regarding its supplier risk and approval process, its procedures for traceability outlined in its fraud prevention plan, and its process to detect mislabeled, falsified certificates, or substitutions of nonorganic products referenced in its recall procedures. In addition, PCO identified a new entity in Mapeks USA's supply chain that shared the same primary contact and physical address as Mapeks USA and was not disclosed by Mapeks USA. Further, PCO identified through the assessment of Mapeks USA's audit trail records that Mapeks USA was connected to several other companies and failed to update its organic system plan or notify PCO of these businesses in the supply chain. PCO implied that Mapeks USA willfully failed to disclose entities in its supply chain due to Mapeks USA's relationship to the entities. PCO requested a detailed description of Mapeks USA's business structure to identify all responsibly connected parties.

On August 19, 2025, PCO provided NOP with additional details to support its claim that Mapeks USA breached the March 14, 2025, Settlement Agreement with NOP through Mapeks USA's failure to disclose all activities and transaction of their operation in detail. Specifically, PCO stated that during a July 17, 2025, unannounced inspection, traceback documentation was missing from a specific lot of sweet cherries imported from Turkey. According to an email, the order for the sweet cherries was cancelled on May 9, 2025. However, the Sea Waybill identified the same lot of sweet cherries as shipped on board April 28, 2025. Therefore, the lot of sweet cherries left the port before the order was cancelled. An email obtained at the July 17, 2025, unannounced inspection, translated from Turkish, demonstrated that the lot of sweet cherries in question was not certified organic, and the import certificate was rejected by another USDA-accredited certifier. In addition, Mapeks USA did not have records to verify disposition of the sweet cherries. Therefore, based on the sweet cherries' shipment date being prior to the cancellation date, the container arrived in the United States, instead of being disposed of.

On August 21, 2025, Mapeks USA responded to PCO's July 22, 2025, Notice of Noncompliance with corrective actions and supporting evidence. Mapeks USA cited it would institute a comprehensive procedure for notifying PCO of any changes in handling practices, warehouse operations, or certifications prior to implementation. In addition, Mapeks USA submitted Exempt Handler Affidavits for its warehouses and logistics providers in its supply chain. Further, Mapeks USA provided an updated Fraud Prevention Plan, which included verification of organic certificates for every shipment, quarterly mock recalls, and annual staff training on compliance, fraud awareness, and organic integrity. Lastly, Mapeks USA provided an organizational chart to clarify business connections with other companies found to be part of the supply chain during PCO's assessment of Mapeks USA audit trail records.

On September 9, 2025, PCO determined that Mapeks USA's August 21, 2025, corrective actions were not sufficient due to the submission missing Exempt Handler Affidavits. According to PCO, Mapeks USA did not provide Exempt Handler Affidavits for warehouses outlined in PCO's July 2, 2025, Notice of Noncompliance. However, Mapeks USA did provide Exempt Handler Affidavits for warehouses not approved by PCO. PCO provided Mapeks USA with additional time to respond with the missing documentation by October 9, 2025.

On October 7, 2025, Mapeks USA provided PCO with its Warehouse Notification and Procedures, and on October 10, 2025, Mapeks USA provided sufficient PCO Exempt Handler Affidavits. It took nearly 3 months and multiple requests by PCO for Mapeks USA to submit sufficient information to address the July 22, 2025, Notice of Noncompliance. Mapeks USA has yet to demonstrate implementation of these corrective actions in a way that corrects and prevents recurrence of the noncompliances.

On February 27, 2026, PCO notified NOP of additional breaches of the March 14, 2025, Settlement Agreement and additional noncompliances that were based on observations and documents collected at Mapeks USA's unannounced and annual inspections, conducted on July 17, 2025, and December 2, 2025. PCO cited the following additional settlement breaches:

- Mapeks USA did not maintain, and submit to PCO upon request, all records that outlined the movement of the lot of sweet cherries during the time the lot was received, transported, stored, and shipped.

- Mapeks USA received the lot of sweet cherries without a National Organic Program Import Certificate and continued to label and handle the nonorganic lot as organic.

Additionally, on February 27, 2026, PCO, notified NOP of additional willful violations. According to PCO, additional entities were discovered in Mapeks USA's supply chain whose contact information, point of contact, or business website was the same as Mapeks USA. Specifically, PCO identified, through supply chain documentation provided by another USDA accredited certifier, an entity with a similar name to Mapeks USA, who Mapeks USA stated did not have any relation to its business. However, PCO determined through a search of the Organic Integrity Database that the entity and Mapeks USA, while different points of contact information, had the same business website name, and the website link directed users to the same business website for both operations. In addition, PCO found that the supply chain documents provided by the accredited certifier of the other entity had a logistics company, which PCO determined had the same address and the same individual listed as an officer as Mapeks USA. Therefore, PCO alleged that Mapeks USA created new entities in its supply chain that it willfully failed to disclose to PCO and continued to deny its relationship with the entities.

CONCLUSION

Mapeks USA continues to violate the USDA organic regulations despite being given multiple opportunities by PCO and NOP to comply. The evidence substantiates that Mapeks USA violated the USDA organic regulations at 7 CFR 205.400, General requirements for certification; 7 CFR 205.406, Continuation of certification; 7 CFR 205.100, What has to be certified; 7 CFR 205.102, Use of the term, "organic"; 7 CFR 205.103, Recordkeeping by certified operations; 7 CFR 205.201, Organic Production and handling system plan; and 7 CFR 205.300, Use of the term, "organic".

The NOP entered into a Settlement Agreement with Mapeks USA in good faith, providing Mapeks USA with an opportunity to retain its organic certification, despite continual noncompliances issued by PCO and NOP between August 2024 and March 2025. Mapeks USA has continuously failed to maintain documentation to allow for supply chain traceability and transparency in the import and export activities of its operation. The NOP Settlement Agreement states that, "Mapeks USA agrees that the failure to abide by the terms of paragraphs immediately above shall result in USDA, AMS possibly pursuing administrative action against Mapeks USA." Clause 3D of the Settlement Agreement states that, "Mapeks USA withdraws its appeal and waives further appeal rights in this matter. Failure to comply with the Settlement Agreement shall automatically void paragraph 2 above." Paragraph 2 states, "USDA, AMS agrees not to issue a formal Administrator's Decision charging Mapeks USA with alleged violations of the OFPA and the USDA organic regulations for any actions disclosed by the investigation which gave rise to this agreement." A closure letter sent to Mapeks USA on March 14, 2025, with the executed Settlement Agreement also stated that, "… failure to abide by the terms of the agreement shall automatically void the Settlement Agreement and USDA, AMS may pursue an administrative hearing process."

Therefore, AMS finds that Mapeks USA has breached its March 14, 2025, Settlement Agreement with NOP. Pursuant to the terms of the Settlement Agreement, Mapeks USA may not remain certified.

DECISION

Mapeks USA's Appeal of the August 20, 2024, Notice of Noncompliance and Proposed Revocation, and Appeal of the February 3, 2025, Notice of Proposed Suspension are denied. The organic certification of Mapeks USA is revoked. Pursuant to the organic regulations at 7 CFR

205.662(f)(2), Mapeks USA will be ineligible to receive certification for a period of 5 years following the date of such revocation. While under revocation, Mapeks USA may not knowingly handle, sell, label, or represent any products as organic.

Should Mapeks USA wish to appeal this matter further, Mapeks USA has thirty (30) days to request an administrative hearing before an Administrative Law Judge.

Done at Washington, D.C., on this _30_
day of __July__, 2026.
